

Making index.html changes

- Go to the **EOS folder in Finder**
- To edit the **index.html** file, open it with the **Visual Studio Code** app.

Once you've finished editing, save the file using (**CMD + S**)

Launching Terminal

- Open Finder.**
- Go to the **EOS folder** (this is the main folder we set up together).
- Right-click** (or long tap) on **the EOS folder**.
- Hover over Services, then click on "**New Terminal at Folder**".

Uploading changes

- In the terminal window that opens, type: **git pull**
- Type: **git status**
- Type: **git add .**
- Type: **git commit -m "your message here"**
- Type: **git push**
- Press Enter.
