

Here are the instructions for making changes:

**Step 1:**

- Open Finder.
- Go to the EOS folder (this is the main folder we set up together).

**Step 2:**

- Right-click (or long tap) on the EOS folder.
- Hover over Services, then click on "New Terminal at Folder".

**Step 3:**

- In the terminal window that opens, type:  
git pull  
Press Enter.

**Step 4: Make Your Changes**

- Go back to Finder and open the files you want to change (for example, images or the index.html file).
- To edit the index.html file, open it with the Visual Studio Code app.

**Step 5:**

Once you've finished editing, save the files using ( CMD + S )

**Step 6:**

- Go back to the EOS folder in Finder.
- Right-click (or long tap) on the folder again.
- Choose Services > New Terminal at Folder.

**Step 7:**

- In the terminal, type:  
git status  
Press Enter. This will show the list of changes you made.

**Step 8:**

- Type:  
git add .  
Press Enter.

**Step 9:**

Type:

```
git commit -m "your message here"
```

Example: `git commit -m "Updated homepage image"`

**Step 10:**

Type:

```
git push
```

Press Enter.
