

Step 1: Make Your Changes

- Go to the **EOS folder in Finder**
- To edit the **index.html** file, open it with the **Visual Studio Code** app.

Step 3:

Once you've finished editing, save the files using (**CMD + S**)

Step 4:

- Open Finder.**
- Go to the **EOS folder** (this is the main folder we set up together).

Step 5:

- Right-click** (or long tap) on **the EOS folder**.
- Hover over Services, then click on "**New Terminal at Folder**".

Step 6:

- In the terminal window that opens, type: **git pull**
- Press Enter.

Step 7:

- Type: **git status**
- Press Enter. This will show the list of changes you made.

Step 8:

- Type: **git add .**
- Press Enter.

Step 9:

- Type: **git commit -m "your message here"**
- Example: **git commit -m "Updated homepage image"**

Step 10:

- Type: **git push**
- Press Enter.
